

Dear Prof.

I am writing to inquire about the possibility to join your group as a visiting researcher.

I am currently a Post Doc researcher at I have an academic background in physical science combined with a practical work experience in basic research.

My main research area has been so far the fabrication and characterization of The major objective of my PhD, defended early this year, was to find novel ways to modify the I mastered the techniques needed to fabricate and characterize them with a variety of techniques.

Recently I was granted a postdoctoral scholarship from The grant is based on a proposal entitled which I had submitted to; it was evaluated and accepted by an expert board. With this project, I would like to exploreforapplications.

During this fellowship I will have the opportunity to spend max one year as a funded visiting researcher in another institute. I would like to take this chance to join an academic group working on In fact, I would like to challenge myself working in a new research field and I believe that with my experimental background and motivation, I could have a valuable contribution.

I have noticed that you have done extensive research works in so I would be grateful if you would give me the possibility to join your group, starting any time in spring or summer 2013 for a period of at least 6 months.

I have attached my CV for your review and look forward to hearing from you.

Best regards,
